FOR THE FARMER.

The Kansas experiment station has issued a bulletin strongly favoring alfalfa. As alfalfa is absolutely essential to the cheapest production of beef, pork and milk and the rapid growth of young farm animals, says the bulletin, it is evident that farmers without it are at a great disadvantage. Our work in fattening hogs shows its value. One lot of hogs were fed all the grain they would eat and another lot all the grain and all the alfalfa they would eat. The hogs having the alfalfa hay ate more grain and gained more pounds of pork for each bushel of grain consumed, showing a gain of 808 pounds of pork per ten of alfalfa hay. Hogs on alfalfa pasture showed a gain of 776 pounds per acre of pasture.

We find that alfalfa hay and corn or Kaffir corn make the cheapest combination of feed for milk production, securing a good yield of milk and of butter fat at the least cost, with butter of good quality in regard to firmness. With skimmilk, Kaffir corn, grain and alfalfa hay we have been able to make calves gain nearly two pounds per day from birth to 6 months of age, a gain equal to that made by calves sucking their dams.

This station has not had sufficient money to test the value of alfalfa for fattening steers. Feeders report that in fattening steers with corn when hay, fodder or sorghum is used for roughness the steers gain from 1 1/2 to 2 pounds per day each. When alfalfa hay is the rough feed, fattening steers gain 2 1/2 to 3 pounds per day each. Alfalfa is our best soil enricher, bringing up plant food to the surface soil from greater depths than any other crop plant grown in Kansas. It seems imperative, then, that eastern Kansas farmers should grow alfalfa if possible, as they need it both for feed and for fertilizer.

Most trials of alfalfa in eastern Kansas have been failures, but we have found alfalfa grown successfully under almost every condition of soil to be found in the eastern part of the state, and we believe that a large portion of eastern Kansas, from Nebraska to Indian Territory, is a natural alfalfa country. Alfalfa will not grow on wet land nor where rock comes near the surface. It is easiest grown where the subsoil is rich and porous, but good crops have been harvested many years in succession on land underlaid with as tough and hard subsoils as there are in the state. A successful alfalfa grower of wide experience recently said that any land which will produce good corn regularly and on which cottonwood trees do well is good alfalfa land.

Diseases of Wool. Wool has its diseases as the sheep has, says The Sheep Breeder. But the diseases of the fleece does not hurt the sheep as to its general health. Hair and wool are precisely the same in composition and general character except that hair is smooth and wool is rough to the touch. One of the diseases of wool causes the fibers to split and tangle together, forming matted patches all over the body. Another causes the wool to felt, forming patches of short hairylike balls, which loosen from the skin and leave bare spots which are red and inflamed. All these are infections, and the disease will spread from one sheep to another until, if neglected, the skin is bare over half the body of the sheep sometimes. A lookout should be kept for these diseases, and immediate treatment should be applied. The easiest remedy is to apply tincture of iodine to the skin, soaking the wool where it is still retained. The disease is really in the wool and not in the skin, but yet the skin may be infected by the diseased wool. It is due to a minute fungus which grows in the fibers of the fleece, destroying the substance of the wool and reducing it to short pieces or even dust. These diseases are virulently infectious, and when they appear instant action should be taken.

DeWitt's Witch Hazel Salve is unequalled for piles, injuries, skin diseases. It is the original Witch Hazel Salve. Beware of all counterfeits. H. K. H. Pharmacy, John Shepard, S. K. H.

BE GOOD TO YOURSELF and good to your friends. When you treat a friend to whiskey, give him the best. HARTER Whiskey is the beverage for your friends and for you.

These tiny Capsules are superior to Balsam of Copaiba, Cereals and Injections. They cure in 48 hours the same diseases without any inconvenience. SOLD BY ALL DRUGGISTS.

Little Pimples Turn to Cancer.

Cancer often results from an impurity in the blood, inherited from generations back. Few people are entirely free from some taint in the blood, and it is impossible to tell when it will break out in the form of dreaded Cancer. What has appeared to be a mere pimple or scratch has developed into the most malignant Cancer.

"I had a severe Cancer which was at first only a few blotches, that I thought would soon pass away. I was treated by several able physicians, but in spite of their efforts the Cancer spread until my condition became alarming. After many months of treatment and growing steadily worse, I decided to try S. S. S., which was so strongly recommended. The first bottle produced an improvement, I continued the medicine, and in four months the last little seed dropped off. Ten years have elapsed, and not a sign of the disease has returned." R. F. WILLIAMS, Gillsburg, Miss.

It is dangerous to experiment with Cancer. The disease is beyond the skill of physicians. S. S. S. is the only cure, because it is the only remedy which goes deep enough to reach Cancer.

S.S.S. For The Blood (Swift's Specific) is the only blood remedy guaranteed Purely Vegetable. All others contain potash and mercury, the most dangerous of minerals. Books on Cancer and blood diseases mailed free by Swift Specific Company, Atlanta, Georgia.

Important to Cranberry Growers. WASHINGTON, Feb. 12.—The director of the census requests all cranberry growers, who have received special schedules from the census office regarding their industry and have not filed them out and returned them to the office, to do so at their earliest convenience. In case any cranberry grower has not received such a schedule, it will aid the census office if he will report that fact in writing, addressed to the census office, Washington.

Steamer Henry M. Stanley Sunk. CINCINNATI, Feb. 12.—The steamer Henry M. Stanley struck the Kentucky pier of the Southern railway bridge this morning and sunk in 25 feet of water with the bow on the Kentucky shore. So far as known only one man was drowned, the steward of the boat, though a number sprang into the water. A dense fog was the cause of the accident.

On Remarriage Committee. AUGUSTA, Ga., Feb. 12.—Hon. F. H. Miller left today for New York, where he is a member of a committee from the Episcopal church to revise and fix the law of the church concerning the remarriage of divorced persons. Mr. Miller is the only representative on the committee south of the Potomac and east of the Mississippi, and his selection is a high compliment, not only to his recognized legal attainments, but to his prominence as a layman in the councils of the Episcopal church.

W. W. WILKINSON,

Greenville, Ala.

Testimonial From Judge Gaston.

GREENVILLE, Ala., Aug. 10, 1898. I have spent many months in the hospital and the most of Wilkinson's Matchless Mineral Water. This natural mineral water, for my personal knowledge, is taken from a well three miles east of Greenville in the exact location in which it is said to have been found, with wonderful success, for dyspepsia, indigestion, etc., and for curative diseases, some of which were not well known. As a remedy for these troubles, it is highly recommended by physicians for a number of diseases.

Z. L. GASTON, Judge of Probate Court, Butler County, Alabama.
